

Auto-Gard T

Traffic Coatings

Reinventing traffic coatings with Auto-Gard T

Traditional aggregate “Pop-Out” effect

Traditional deck systems prematurely lose aggregate

Auto-Gard T aggregate retention

Excellent aggregate retention under the harshest traffic conditions

Get tough on maintenance

Auto-Gard T is the next generation of vehicular deck coatings. This innovative coating system combines the proven track record of the Auto-Gard system with the improved speed, handling, and durability of a high-performance in-can aggregate.

Proven Auto-Gard technology

Auto-Gard T uses liquid coatings that are part of the current high solids and low odor Auto-Gard system. These products have been used successfully in the US and internationally since 2003.

Traditional Aggregate
Controlled abrasion test:
notice "Pop Out" of aggregate

Auto-Gard T
Controlled abrasion test:
aggregate bonds to coating.

Auto-Gard T

Integrally textured

No more broadcasting of traditional aggregate. The Auto-Gard T topcoat incorporates a high performance synthetic aggregate in the liquid coating. This eliminates the need to broadcast hazardous silica sand, saving time and money.

Longer life

Due to the chemical nature, size, shape of the synthetic aggregate and the fact that it has wetted out in the coating prior to cure, the finished system has a much better tendency to hold aggregate over time than traditional coating systems. This results in longer system life as evidenced by accelerated abrasion testing done by NEOGARD.

Higher performance

As texture is retained for a longer time period, the Auto-Gard T system maintains excellent grip over the life of the coating system and retains better Coefficient of Friction ratings than equally aged traditional aggregate coating systems.

NEOGARD®, a Division of Hempel (USA), Inc., is a fully integrated research and manufacturing organization in Dallas, Texas. NEOGARD® products have been specified and used on prestigious projects around the world by leading architects, engineers and consultants for over 50 years. Our line of coating systems protects the building envelope through vehicular and pedestrian traffic coatings, protective roof coatings, seamless flooring and elastomeric wall coatings.
