

Hi Tish,

We want to thank you for an amazing transformation of our property. We thought we had an idea of what we wanted when we first met with you, however, your imagination, vision, and your uncanny ability to adapt to the land has resulted in magical spaces in our yard. Simply put, we didn't know how great our property could be until you designed this little slice of paradise for us.

Of course the key ingredient that made this entire project successful, and a joy during the process is your crew. Carlos, Javier, Jose and Ni, as well as Greg and Ray, are absolutely the best. Super hard workers who were always very accommodating to our asks and invariably left the space spotless every evening when they left. Your crew are not "workers", they are master craftsmen in the truest sense of the word. They took enormous pride in everything they did. From the professional rock-work to some difficult grading, as well as the unknown brick and cement edging that was buried, they invariably focused on doing it "right". The result is incredible, and we could not be happier with the entire process.

Thank you Tish!!

Kathy & Steve
