ASK YOUR DOCTOR IF THE SLEEQQ LUMBAR BRACE IS RIGHT FOR YOU AND EXPERIENCE PAIN RELIEF TODAY!

A LUMBAR BRACE MAY BE RIGHT FOR YOU IF YOU HAVE EXPERIENCED ANY OF THE FOLLOWING:

___ Chronic / acute low back pain
___ Muscle spasms
___ Low back sprains and strains
___ Herniated disc
___ Sciatica
___ Back (lumbar) surgery

PROVEN BENEFITS
Lumbar braces have been commonly prescribed to provide relief from low back pain. Clinical studies have proven that a lumbar back brace can also reduce the need for medication and improve functional status. In addition, while sitting or standing for prolonged periods of time, a lumbar brace provides support and promotes proper posture.

WHERE LOW BACK PAIN OCCURS
The lower back (lumbar spine) carries all the weight of the head and torso, making it the most common site of pain. The increased stress in this area of the back leads to injury or degeneration from wear and tear.

BACK PAIN TREATMENT
Lumbar braces are widely utilized to provide safe, immediate pain relief and support needed to restore functional mobility. Additional treatment options are available such as medication, therapy, injections, and surgery. Many find that a combination of these therapies provide their desired pain relief to meet the demands of their unique lifestyle. It’s important for one seeking back pain relief to consider the risks or side effects of each treatment option, including drug dependency. A lumbar brace may be right for you.

YOU’RE NOT ALONE.
Experts estimate that as much as 80% of the population will experience a back problem at some point in their lives. In fact, back pain is the second most common reason for visits to the doctor’s office and one of the most common reasons for missed work.

THE WORLD’S MOST ADVANCED SPINAL COMPRESSION BRACE.
