## Sharp Continues to Enhance A4 MFP Lineup With Two New Monochrome Advanced Series Models

*Feature-packed desktop MFPs share a common controller with Sharp's latest A3 models, offering greater cloud integration, leading-edge security and new voice control features*

Sharp is pleased to announce two new monochrome desktop multifunction printers for the technology-driven workplace, offering strong workflow features, leading-edge security and a compact design.

The new MX-B376W and MX-B476W will replace the MX-B355W and MX-B455W in our current Advanced Series monochrome lineup. The new models operate at 37 ppm and 47 ppm, faster speeds than the current models they are replacing. Both models are available for ordering with deliveries beginning in late August 2019.

These models also feature Sharp's award-winning, easy-to-use 7" (diagonal) touchscreen display. The available **MFP Voice feature** with **Amazon Alexa** enables users to interact with the machine by using simple verbal commands to copy or scan documents.

The MX-B376W and MX-B476W deliver high functionality and offer full multifunction capability out-of-the-box, including copy/print/scan/fax. Standard **wireless networking** enables users to easily manage their workflow from PCs, smartphones and tablets. The Advanced Series MX-B476W also boasts a **100-sheet duplex single pass feeder (DSPF)** for high productivity in busy workplace environments.

The new models integrate seamlessly with today's complex network environments and support enhanced cloud services that now include **Box** and **Dropbox**. Sharp's standard **Application Portal** allows administrators to easily add new apps and update existing apps right from the MFP touchscreen. **Adobe® Embedded Print Engine** technology (standard on both models) enables users to direct print PDF files locally or from the cloud with greater accuracy and performance.

The MX-B376W and MX-B476W also deliver Sharp's leading-edge security features, such as **Firmware Attack Prevention** and **Self-Recovery**, which can identify a malicious intrusion and restore the machine firmware to its original state. The new **Application Whitelisting** feature protects the machine's file system from unauthorized access. Additionally, administrators can centrally manage select settings using **Active Directory® Group Policy**.

To learn more about these new features and more, see the hyperlinks on page 3 of this announcement.

Please note that a new ENERGY STAR® specification goes into effect on October 11<sup>th</sup> 2019. These newly introduced models meet this new ENERGY STAR 3.0 standard. Additionally, the majority of our existing lineup will also meet the new standards. As Energy Star requirements evolve periodically, we recommend you check their online resources at <https://www.energystar.gov/productfinder/product/certified-imaging-equipment/results> to confirm the current certification status of a product. This is especially important if your customer has specified a requirement for ENERGY STAR compliance.

**Availability for Ordering**

The new MX-B376W and MX-B476W Advanced Series monochrome document systems are available for ordering via authorized Sharp dealers and direct sales. Delivery for Both models will begin in late August 2019.

**Collateral Material**

Printed brochures will be available from the Hibbert Group. Please call 609-421-4212. Brochures, specification sheets, sales presentations, configuration charts, and more can be downloaded from our Sharp Success Center dealer website: [success.sharpamericas.com](http://success.sharpamericas.com).

Item Code	Description	Your Cost
