

THUNDER MELT™

HIGH PERFORMANCE TREATED SALT

This winter you will be under more pressure than ever before to increase your performance while your customers tighten their budgets. With environmental, cost, and safety pressures growing, Thunder Melt™ is the solution for both you and your customer. Thunder Melt™ is the highest performing treated salt on the market. Coated with Calcium Chloride and a patented bio-based agent, Thunder Melt™ melts faster and lasts longer while reducing your costs and the damaging effects of salt.

Ice melting comparisons measured in milliliters using the testing method set up by the SHRP, Strategic Highway Research Program, H-205.1. Ice melters were tested at 15°F for 20 minutes.

MELT MORE, SPEND LESS

- Thunder Melt™ gets you to a safe surface faster and lasts longer with less product than straight salt or other treated salts.
- Thunder Melt™ is much more effective at lower temperatures than straight sodium chloride.
- Resistant to wind and bounce, Thunder Melt™ stays where you put it reducing need for heavy applications.
- Less product applied means fewer trips back to the pile, saving fuel, equipment wear and labor costs.

READY TO USE

- Thunder Melt™ is sold ready to use. It is made with a proprietary coating process to treat salt with a patented organic accelerator and Calcium Chloride blend.
- Thunder Melt™ is non-caking and does not clump or clog your auger or spreaders.
- Thunder Melt™ is formulated with a patented corrosion inhibitor that significantly reduces wear to both equipment and concrete, helping to save both your trucks and your customer's surface.

GREENER ALTERNATIVE

- Thunder Melt™ advanced liquid treatment, vastly improves salt performance which reduces needed application rates. This means a sharp reduction in sodium chloride use at any site.
- Thunder Melt™ uses cutting edge bio-based technology to get to a safe surface faster while significantly reducing impact to concrete or the environment.
- Be the source of the treated salt alternative your customers are looking for.

■ **SWITCHING TO THUNDER MELT™ CAN REDUCE SALT USE BY 25% OR MORE!**
