

Move Off Old Technology and step into the future

Times are changing. Old fashioned phone lines are just not what they used to be. The prices are high and the value is low. IPitomy has designed innovative SIP trunk plans that deliver what businesses need to stay connected now and into the future. Get the most out of your Internet with IPitomy SIP trunks.

Build Redundancy Into Your Business

Now more than ever, businesses are looking for affordable ways to build disaster recovery options into their telecommunications networks. For those who utilize VoIP technology there is a great way to build redundancy into your system. IPitomy packages starting at \$75.00 a month can give you more line capacity and work as a backup if your traditional lines fail. Ask about our disaster recovery forwarding.

Cost Savings

Most people understand that VoIP will save money. That's a given. Having the right SIP trunks for your business is a critical decision. Try us today and save 50% or more on your monthly phone bill! Even if you have old TDM equipment we can integrate and save you money.

Toll Free Service Savings

IPitomy's Toll Free service allows you to save big on your toll free incoming calls. Ask us about our rates.

Disaster Recovery Options

With IPitomy's standard disaster recovery, you can automatically forward calls to alternate numbers like mobile phones in case of a disaster. This keeps you covered in the event that your Internet or PBX has an outage. (\$10.00 per month, free with 36 month agreement)

With Disaster Recovery Plus, in addition to the standard disaster recovery, you can also have your main # roll into a voice-mail box for your company so you can receive voice mail to emails if the calls are not answered. (\$25.00 per month)
