

I would like to introduce to you Truflo Pumps, Inc. and its sister company, Tru2O, Inc. Truflo Pumps is global pump manufacturer with headquarters in Greensboro, North Carolina U.S.A. With our plants in Korea, and the U.S.A, we service our worldwide customer base with current installations in over 40 countries. Our company has been in the pump manufacturing business since 1984 and since 1999 has operated as Truflo.

Truflo family of companies is proud to supply a full range of quality centrifugal pumps for various applications in the following industries:

- Oil and gas
 - Production
 - Pipelines
 - Refining
 - Terminals
- Petrochemical
- Water treatment
 - Desalinization
 - Demineralization
 - Filtration
- Power generation
- General industry
 - Pulp and paper
 - Automotive
 - Coatings
 - Water treatment
 - Wastewater treatment
 - Coatings
 - Paints
 - Plastics

Our process product range includes the following range. Our metallic line of pumps can be manufactured in DCI, WECB, 316ss, 316L, CD4, Alloy 20, hastelloy and Titanium

- Metallic sealed ANSI pumps with capacities to 7000 GPM
- Metallic magnetic driven pumps up to 300HP
- Non-metallic magnetic driven pumps for severe chemical services
- Self-priming process pumps
- Boiler feed pumps

Our range of API 11th Ed. pumps includes:

- OH2 centerline mounted pumps with capacities to 30,000 GPM
- OH3 vertical
- BB3 multi-stage pumps
- BB1 split case
- BB2 single and multi-stage
- BB3
- BB4 ring section
- BB5
- VS1, VS2, VS3, VS4, VS5, VS6, VS7 vertical pump configurations
- Magnetic driven API 685 to 500HP, high temperature capability

Our state-of-the-art testing facilities, test pumps to 13,400.00 HP (9,900 KW); these facilities are certified to ISO 9001. We have expanded our international facilities extensively in the last three years as we have experienced tremendous growth from many International corporations that have experienced the quality products we manufacture. Today, we manufacture in 5 plants worldwide with well over 1,000,000.00 square feet of production area.

We compete in many markets around the world and are presently conducting business in six continents, including North and South America, Europe, Asia, Africa, and Australia. The Truflo family of companies has strong presence in North and South America, Middle East, and Asia. Our products are successfully utilized at world-famous productions such as Chevron, Samsung Petrochemical, Fuji Photo Film, Boeing, Ford Motor Co., NASA, BASF, Anadarko, DuPont, Exxon, Pemex, PDVSA, OXY, Biomax, Kumho Petrochemical, Western Refining, Petrobras, Suncor, Cargill, OCI, and others. Truflo is committed to delivering products to its customers quickly, at a competitive price, and without compromising our products' superior quality. Often our process and API pump delivery is half the time required for other manufacturers. Our process pumps are so called "In Stock" product for us with immediate shipment of pump and pump packages. Through teamwork, operational excellence, and service, we take pride in exceeding our customers' expectations.

At Truflo, we know that we have to be a better supplier than other manufacturers you presently purchase from. We are therefore committed in all aspects of our business to prove our capabilities. Our deliveries for API pumps are the best in the industry, usually half the delivery time of our major competitors. Following are examples of typical ex-factory delivery times in standard S and A, API material codes.

- OH2- 18-20 weeks
- BB3, BB4, BB5 27-42 weeks
- BB1 pumps 27-30 weeks
- Vertical pumps 30-33 weeks.

In addition, Truflo has manufactured for many years, API 685 magnetic driven seal less pump. We have well over 1000 API mag drive pumps installed worldwide in a variety of applications. We are seeing many refineries look at magnetic drive pumps to replace troublesome sealed API 610 pumps. With seal less pumps you not only eliminate the expensive double seal issues, but also are guaranteed leak free operation. What Truflo brings to the customer are many options and types of pumps to solve the problem, and deliver these pumps quicker than our competitor.
