

Awarded “Best Bone and Joint Health Ingredient”

Liquid BioCell™ is a new generation of super ingredients. Our Bio-Optimized™ manufacturing process produces molecules that your pet’s body can effectively absorb. That’s why Liquid BioCell™ has been awarded 7 patents and multiple industry awards, including “Best Bone and Joint Health Ingredient” by Frost and Sullivan.

Liquid BioCell’s patented matrix of hydrolyzed collagen type II, hyaluronic acid, and chondroitin sulfate mirror the joint’s natural composition so the body readily accepts it.

- **Hydrolyzed collagen II** provides the structural framework of connective tissues to keep joints active and fluid.
- **Chondroitin sulfate** gives joints amazing shock absorbing properties.
- **Hyaluronic acid (HA)** provides lubrication for the joints and throughout your pet’s body.

An award-winning joint health solution and more

Joints: Joint problems can affect any pet, no matter how much care he’s had over his lifetime. As your pet ages, so do his joints; their contents diminish leading to degeneration of the cartilage and chronic joint problems, and although pets do not complain, the condition worsens without treatment. Liquid BioCell™ is clinically shown to improve joint mobility and lubrication, reduce discomfort, and promote healthy cartilage and connective tissue.

Skin and coat: The HA and collagen of Liquid BioCell™ can help nourish and hydrate the dermal layers of your pet’s skin and aid in keratin production for a healthy, shiny coat.

Eyes: Vitreous humor, the fluid in the eye, can break down due to aging or eye injury. HA is often used for possible restoration. Liquid BioCell™ elevates HA levels in the bloodstream after intake, potentially aiding in the health of eyes.

Gums: Gums are integral to tooth health. Liquid BioCell’s unique form of collagen and HA can help support the gingival fibers that attach the teeth.

A breakthrough so advanced, Liquid BioCell™ is a clinically substantiated nutraceutical for dogs and cats of all breeds.

- Veterinarian-approved and endorsed
- Manufactured in a cGMP, NSF, NPA certified facility
- Made in the USA
- Great-tasting natural beef flavor

Liquid BioCell® Pet is the cutting-edge, veterinarian-approved joint health solution for active and senior pets. Exclusively formulated with Liquid BioCell®, clinically shown to improve mobility, reduce discomfort, and improve joint health, while promoting healthy skin and a shiny coat. Our BioOptimized™ manufacturing process produces molecules that your pet's body can actually absorb. That's why Liquid BioCell® has been awarded 7 US patents and multiple industry awards, including "Best Bone and Joint Health Ingredient" by Frost and Sullivan. The advanced, fast-acting, liquid delivery system is highly effective in maintaining the structure, function, and flexibility of your pets' joints, muscles, and connective tissues, while easing discomfort associated with normal daily exercise or active lifestyles. See how your pet can benefit from Liquid BioCell® Pet.

"With Liquid BioCell Pet, I see significant improvement in the discomfort associat-

ed with ligament damage and joint degradation in my animal patients. It's worked on every pet I've given it to." - - George A. Malnati, D.V.M., Doctor of Veterinary Medicine
