

THE STEALTH

ENCRYPT

Encrypt cell phone calls & voice messages The Stealth Encrypt

- Pair with mobile phone
- No registration, no APP installation, use directly
- Digital voice encryption technology
- Encryption upgraded to **AES256**
- Protect your conversation from being eavesdropped

Main Encryption Functions

CELLULAR CALLS

Encrypted calls via cellular networks such as GSM, UMTS and VoLTE

VOIP CALLS

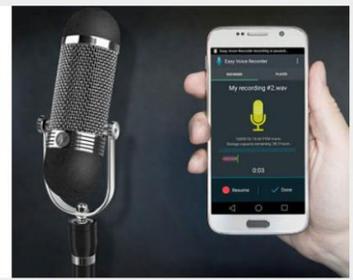

Encrypted calls via VoIP Apps such as WhatsApp, Facetime

VOICE MESSAGE

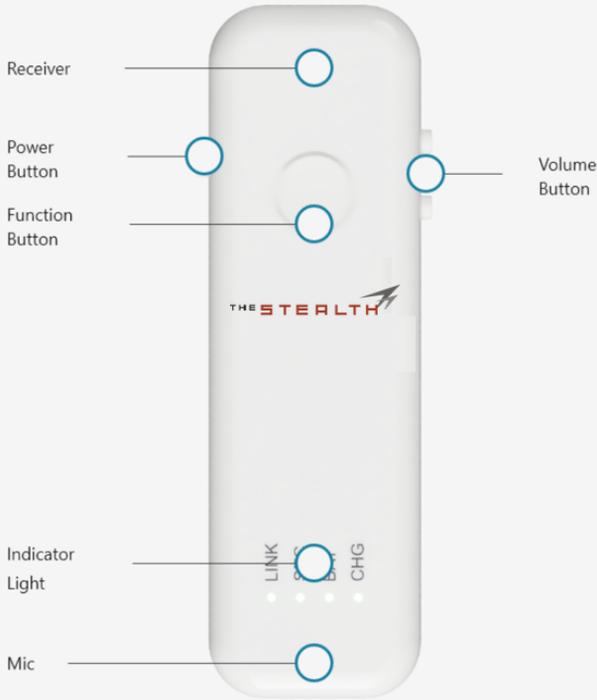

Send and receive encrypted voice messages through IM App such as WhatsApp, Skype, Telegram, etc

RECORDING

Record and play encrypted voice through the voice recorder APP on the mobile phone

Simple Operation

PAIRING

Long press the "Function Button" to Pair with the Phone. Bluetooth will reconnect automatically next time.

SWITCH ENCRYPTION FUNCTIONS

Twice press the "Function Button" to switch between the encrypted call mode, the encrypted voice message mode and encrypted recording mode.

MAKE ENCRYPTED CALLS

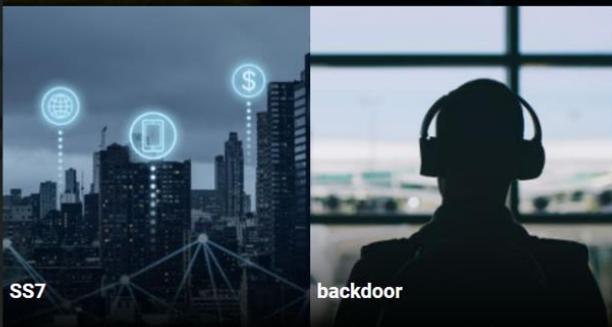

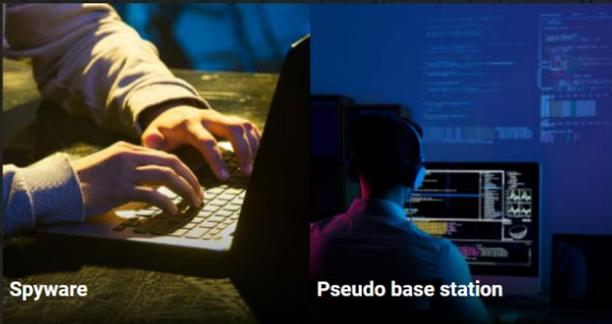

Under encrypted call mode, press the "Function Button" once to switch between encrypted call and normal call.

ENCRYPTED VOICE MESSAGE

Under encrypted voice message mode, encrypted voice message can be recorded/played through Mic/Receiver

Effectively Prevent Various Eavesdropping Methods

The eavesdropper might try to:

Install spyware on your phone to eavesdrop on calls

Use the mobile phone interception system to eavesdrop on your calls

Use the bugs in the telecommunication network to eavesdrop on your calls

and many other methods...

What the eavesdroppers hear is white noise...

What you hear is the decrypted clear sentences...
