

Legend golden retriever and playtime papillons deposit form and agreement

If you want to send a deposit they are non-refundable but can transfer to a different litter. By sending a deposit you are agreeing to this.

We have no control over many factors like how many puppies will be born in a litter, sex of puppies, litters being aborted early or reabsorbed, or girls not becoming pregnant.

Once we breed a litter we start the potential mom on our prenatal care program and do everything in our power to produce a healthy litter. However sometimes our best efforts don't produce a litter. Just like with people not every experience produces a pregnancy, however we do our best to ensure happy healthy puppies. We also breed litters based on current deposit list of people willing to wait for a puppy from us. We don't believe in flooding the market with a bunch of puppies.

Breeding responsibly means we have homes willing and ready for a puppy before we breed a litter. This is why we hold a deposit waiting list. This is also why deposits are non-refundable. We are both making a commitment to a future life.

Deposit checks go directly towards the expense of feeding dogs, doing health checks, vet work and so on related to producing a healthy dogs.

If you want to send a deposit I need you to print this form and sign and date it so I have something in writing from you stating you understand about the deposit policy. If this email isn't printed your deposit check won't be valid until I have the printed and signed/dated form.

I also need.
