

CONTREP™

Intermodal Container Repair Systems

What is CONTREP?

CONTREP is an intermodal container repair system with an **innovative** and **patent-pending design** that has been created specifically to **simplify and revolutionize intermodal container repairs**.

Our repair systems correct bulges and dents caused by blunt force damage on virtually any part of a freight container with minimal physical effort required; **only one person is needed for full operation!**

Besides cutting down on the amount of manpower needed to complete repairs, our systems also minimize the costs associated with rebuilding walls and the hours of welding these repairs would usually entail.

Uses & Benefits

CONTREP intermodal container repair systems have been meticulously designed to effectively repair and restore damaged container surfaces at any height or location including:

- ◆ Walls
- ◆ Ceilings
- ◆ Corner Posts
- ◆ Door Frames

CONTREP™

Intermodal Container Repair Systems

Uses & Benefits (continued)

Some additional benefits that CONTREP can provide for intermodal container repairs:

- ◆ Reduce repair times by 40-70%
- ◆ Reduce manpower and physical effort necessary for any repair
- ◆ Reduce or eliminate the need for additional materials and welding
- ◆ Reduce repair costs (materials, labor)
- ◆ Greatly increase quality of repairs both visually and structurally
- ◆ Reduce risk of injury by requiring less physical effort

CONTREP™ Model R-04

CONTREP is the **only** intermodal container repair system in existence capable of correcting door frames that are out of alignment; a first in the container repair industry!
