INDEXING

Allows commercial index to determine strategy

Attempts to match index performance, restricting which securities to hold and when to trade

Prioritizes low tracking error over higher expected returns

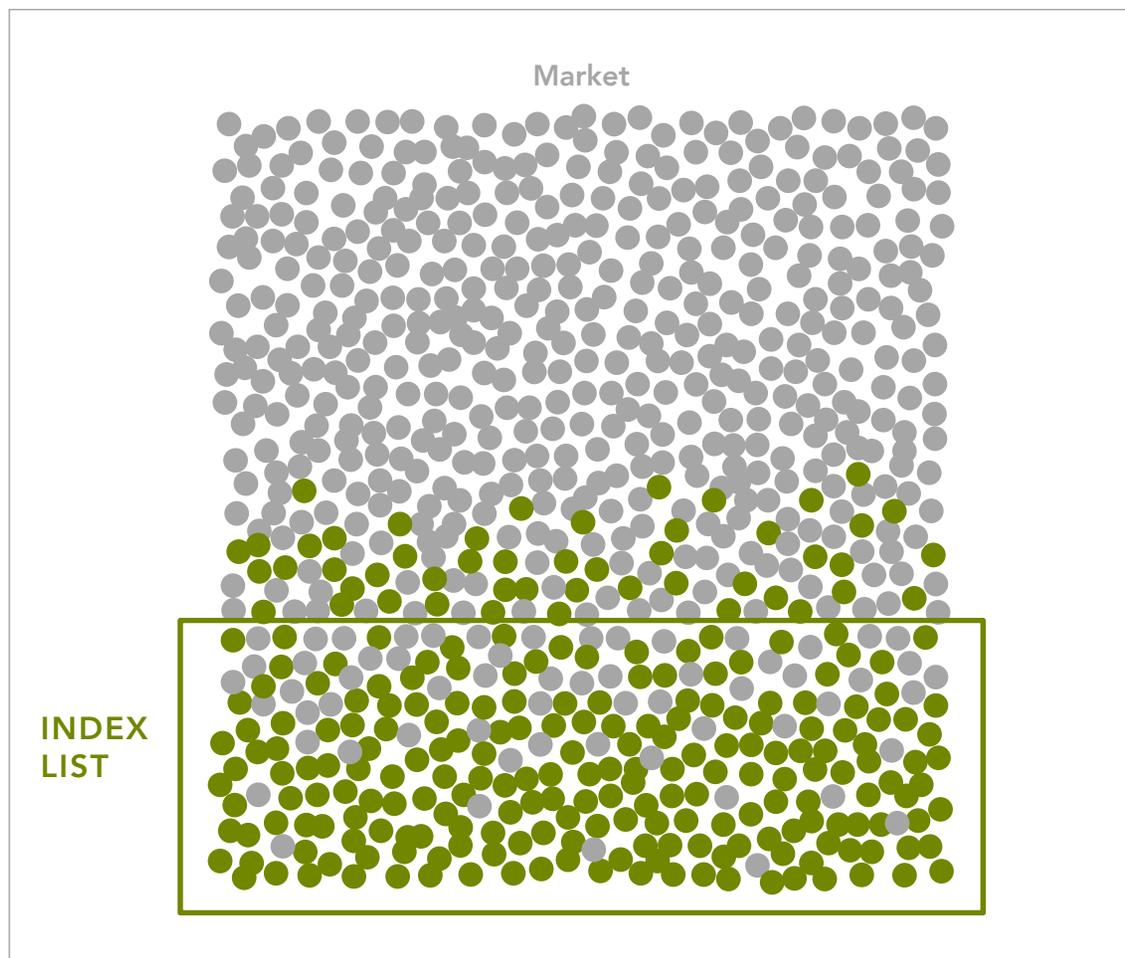

The Indexing Approach Attempts to Match the Returns of a Commercial Benchmark

Holds a basket of securities represented in the index.

Buys and sells the same securities at the same time as all other funds tracking the index.

The Indexing Approach Attempts to Match the Returns of a Commercial Benchmark

Six months later:

Securities have moved in and out of the index's targeted range

As a result, your investment may have drifted from what you intended.

We See the Market in a Different Dimension

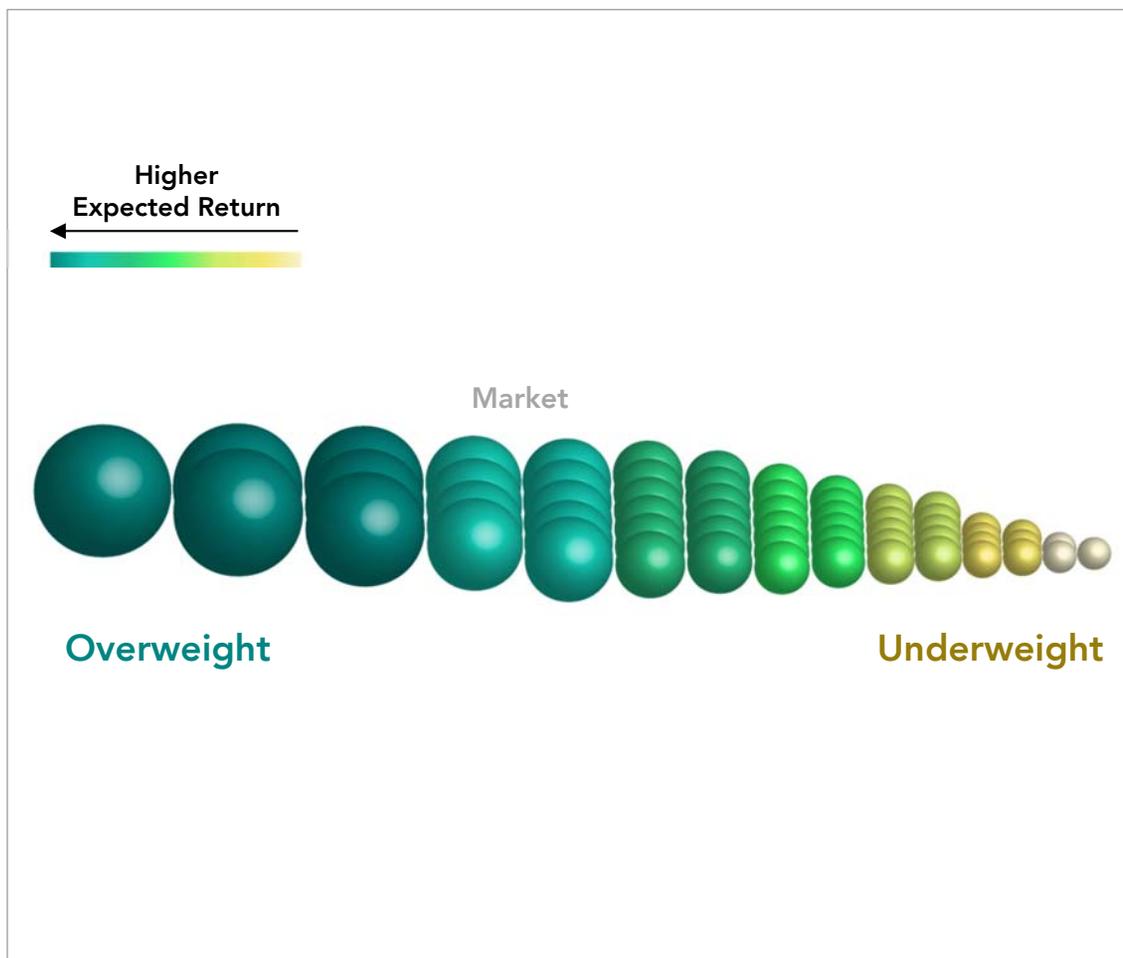

We See the Market in a Different Dimension

Decades of academic research and rigorous testing help us identify relevant dimensions that point to **differences in expected returns**.

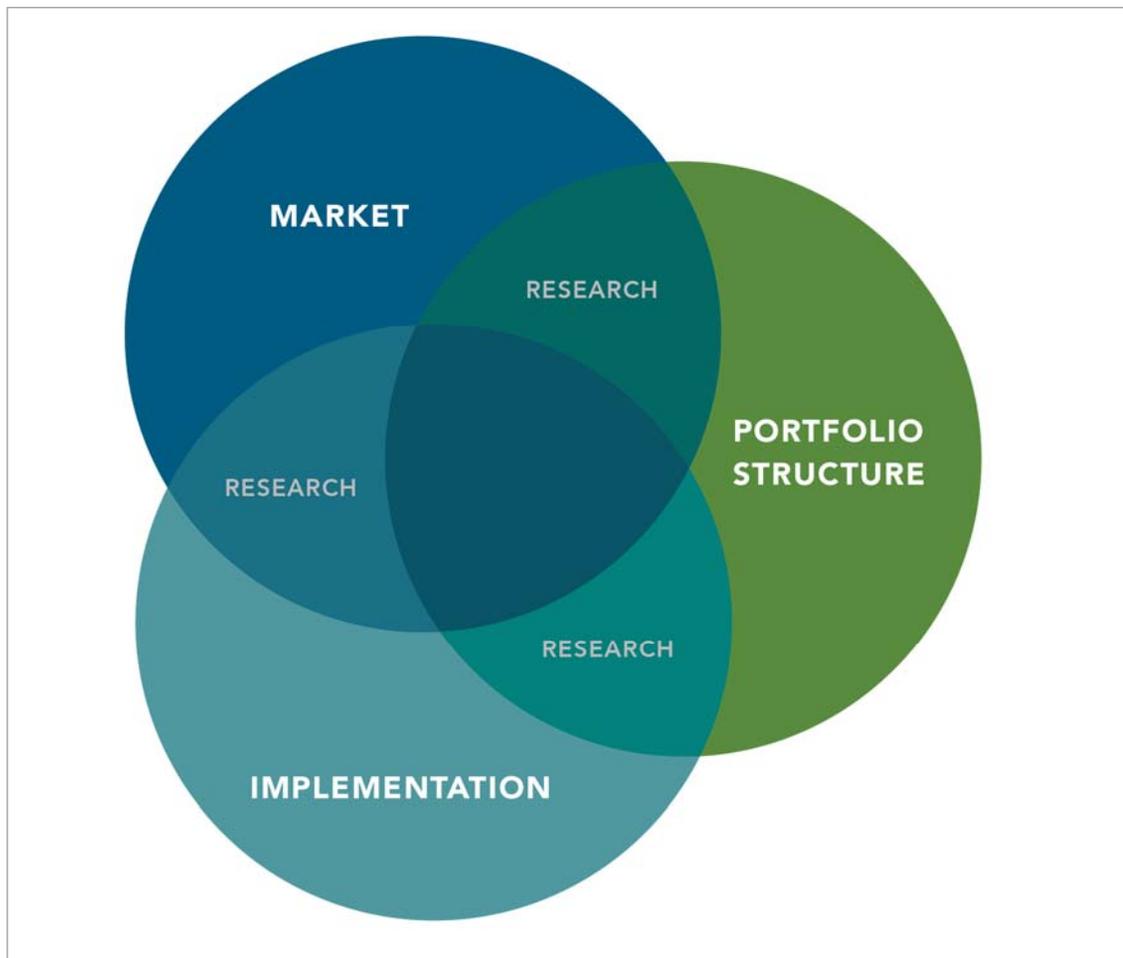

Dimensional Structures Portfolios Along Dimensions of Expected Returns

Within well-diversified portfolios, we **emphasize** areas of the market with higher expected return potential.

The Dimensional Difference

From Insights to Implementation

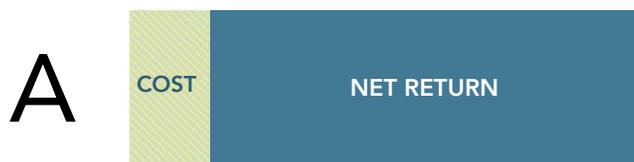

Our integrated investment process adds value at each step.

We apply research throughout our process to advance our understanding of all aspects of investing.

Balancing Investment Tradeoffs

Dimensional designs strategies to reduce the total cost of pursuing expected returns

INVESTMENT OPPORTUNITY

CONDITIONS

Broad diversification and patient, flexible trading lead to **lower turnover and costs**.

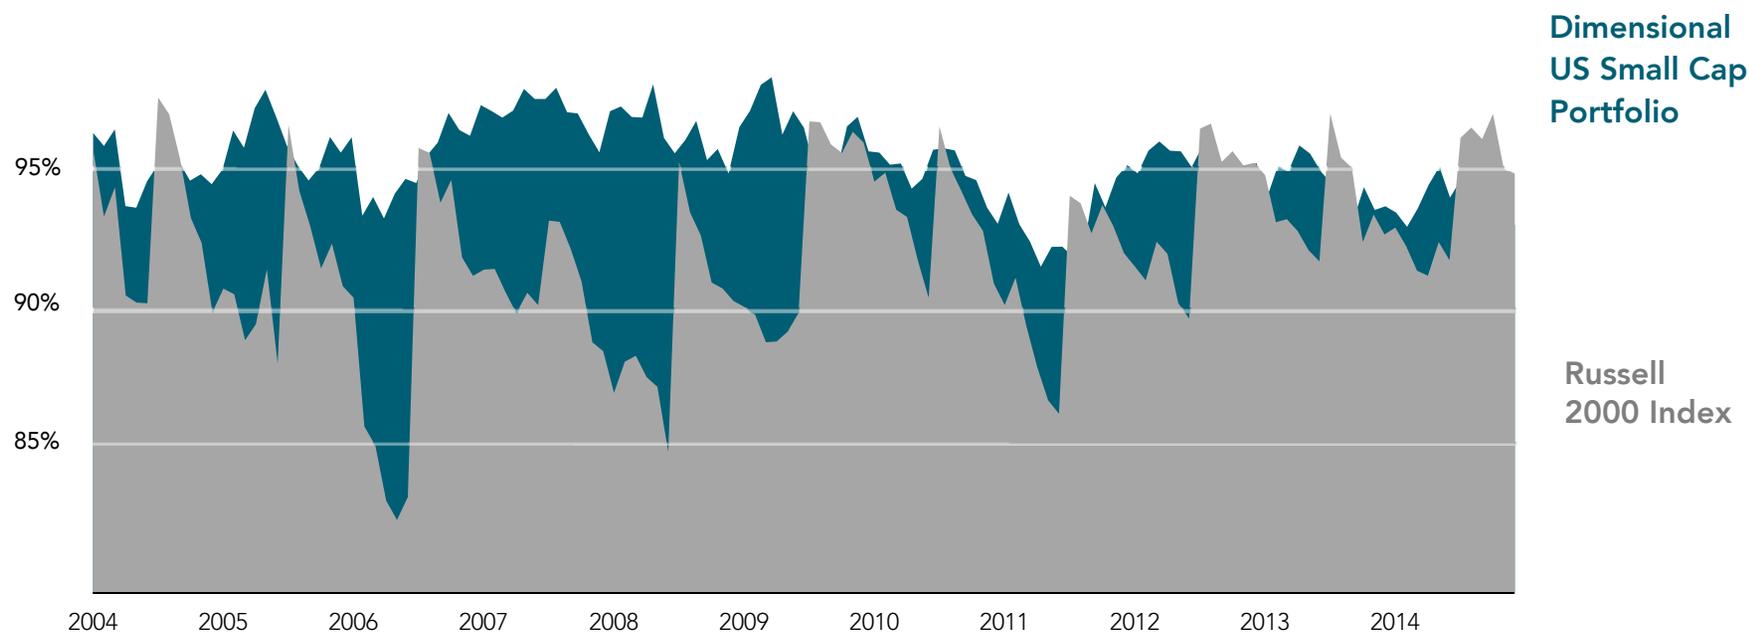

Concentrated holdings and urgent, inflexible trading result in **higher turnover and costs**.

Two investment opportunities can have the same expected return but invite very different conditions.

These conditions result in different costs, which impact net returns.

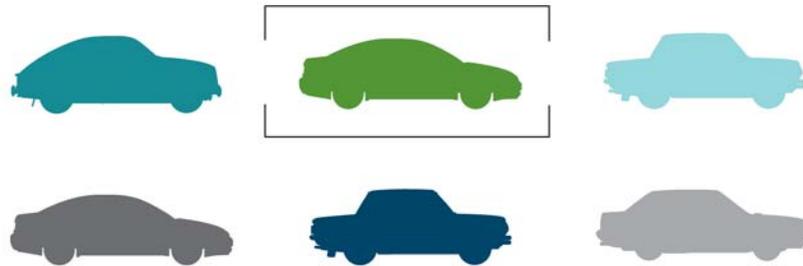

Managing Portfolios to Maintain Asset Class Consistency

Data Appendix

Research conducted by Dimensional Fund Advisors LP. Mutual fund data is from the CRSP Mutual Fund Database, provided by the Center for Research in Security Prices, University of Chicago.

Certain types of equity and fixed income funds were excluded from the performance study. For equities, sector funds and funds with a narrow investment focus, such as real estate and gold, were excluded. Money market funds, municipal bond funds, and asset-backed security funds were excluded from fixed income.

Funds are identified using Lipper fund classification codes and are matched to their respective benchmarks at the beginning of the 10-year sample period. Winner funds are those whose cumulative return over the period exceeded that of their respective benchmark. Loser funds are funds that did not survive the period or whose cumulative return did not exceed their respective benchmark. Non-survivors include funds that were either liquidated or merged.

Standardized Performance Data & Disclosures

Performance data shown represents past performance. Past performance is no guarantee of future results, and current performance may be higher or lower than the performance shown. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. To obtain performance data current to the most recent month end, access our website at us.dimensional.com.

Consider the investment objectives, risks, and charges and expenses of the Dimensional funds carefully before investing. For this and other information about the Dimensional funds, please read the prospectus carefully before investing. Prospectuses are available by calling Dimensional Fund Advisors collect at (512) 306-7400 or at us.dimensional.com/prospectus. Dimensional funds are distributed by DFA Securities LLC.

Dimensional Fund Advisors LP is an investment advisor registered with the Securities and Exchange Commission.

Risks include loss of principal and fluctuating value. Investment value will fluctuate, and shares, when redeemed, may be worth more or less than original cost.

Small and micro cap securities are subject to greater volatility than those in other asset categories.

International and emerging markets investing involves special risks such as currency fluctuation and political instability. Investing in **emerging markets** may accentuate these risks.

Sector-specific investments focus on a specific segment of the market, which can increase investment risks.

Fixed income securities are subject to increased loss of principal during periods of rising interest rates. Fixed income investments are subject to various other risks, including changes in credit quality, liquidity, prepayments, call risk and other factors. **Municipal securities** are subject to the risks of adverse economic and regulatory changes in their issuing states.

Real estate investment risks include changes in real estate values and property taxes, interest rates, cash flow of underlying real estate assets, supply and demand, and the management skill and creditworthiness of the issuer.

Sustainability funds use environmental and social screens that may limit investment opportunities for the fund.

Commodities include increased risks, such as political, economic, and currency instability, and may not be suitable for all investors. The Portfolio may be more volatile than a diversified fund because the Portfolio invests in a smaller number of issuers and commodity sectors.

The fund prospectuses contain more information about investment risks.
