

## Waleed Al-Oboudi

WALEED AL-OBOUDI, MOT, OTR/L,

is a therapist and educator in the field of rehabilitation nationally and internationally for over 30 years. He is the originator of the Neuro-IFRAH® approach and is known for his concepts and clinical skills in the treatment and management of patients affected by a stroke or brain injury. Many of his basic to advanced concepts are copied, as he was the mentor of a number of known educators for any years. He is the originator of all his intermediate to advanced concepts and applications. He is also the originator of the IFRAH® concepts and applications for patients affected by orthopedic conditions. Mr. Al-Oboudi's Neuro-IFRAH® approach includes a whole system of hands-on therapy, training equipment, and orthotics that are taught by Neuro-IFRAH® Instructors at top facilities and are popular and effective courses nationally and internationally. Mr. Al-Oboudi's concepts and clinical skills are self-evident and aim to set a standard of excellence in rehabilitation as they have been continuously demonstrated in live national conferences, courses, and teleconferences for over 25 years.

Neuro-IFRAH : "Game Changing Therapy"

"Today, my daughter who was given the prognosis of possibly never walking again, and certainly not without a cane, walks so beautifully on her own that strangers don't know she had a stroke. This is entirely because of Mr. Al-Oboudi and his Neuro-IFRAH® trained therapists." Marabeth Q

"By far, the Neuro IFRAH approach has been unmatched in the rehabilitation approaches we have been exposed to. I have continually been amazed at how skillful the Neuro IFRAH therapists are at analyzing movement and identifying how to set up conditions for success, how to build these successes into bigger successes, and eventually how this all translates into function. And all the while, they are astutely attuned to my husband's emotional and psychological well-being." Debra G

"She had seen others with no results, but since she has been attending the Neuro-IFRAH clinic her progress is phenomenal, since she is recovering, her confidence has increased and most of all her hope of living an independent life is actually going to become a reality. We cannot overstate our appreciation, respect, and happiness Waleed's work has affected our daughter's life."

Derrick and Judy G.
