

Historic
AVOYELLES
AUDITORIUM
Moreauville High, Louisiana

Mid-Atlantic Stage was an

integral part in reviving this Jewel-

Featured Project

The finishing touch of Louisiana's Moreauville High School's recent restoration project was the completion of the historic Avoyelles Auditorium. The auditorium was a centerpiece of the main school building that was constructed in 1926 and is still known today as the Moreauville High School. Having survived the Great Flood of 1927, the auditorium was abandoned in 1957 and eventually converted to a classroom and library.

Mid-Atlantic Stage Equipment aided the school in the design process of replacing the outdated stage curtains with new curtains for the front setting and rear setting in addition to a unique, shaped valance that is embellished with a bold monogrammed letter A and accented by golden fringe. After months of intense and tedious labor, the auditorium- a hidden jewel- is once again the centerpiece of the school and community.

-Brent Whiddon, Principal

"Mid-Atlantic's expertise combined with their always helpful and friendly attitude gave us adoring stage curtains that compliment our restored 1927 auditorium."
